

Musician's Friend - Front End Developer Layout

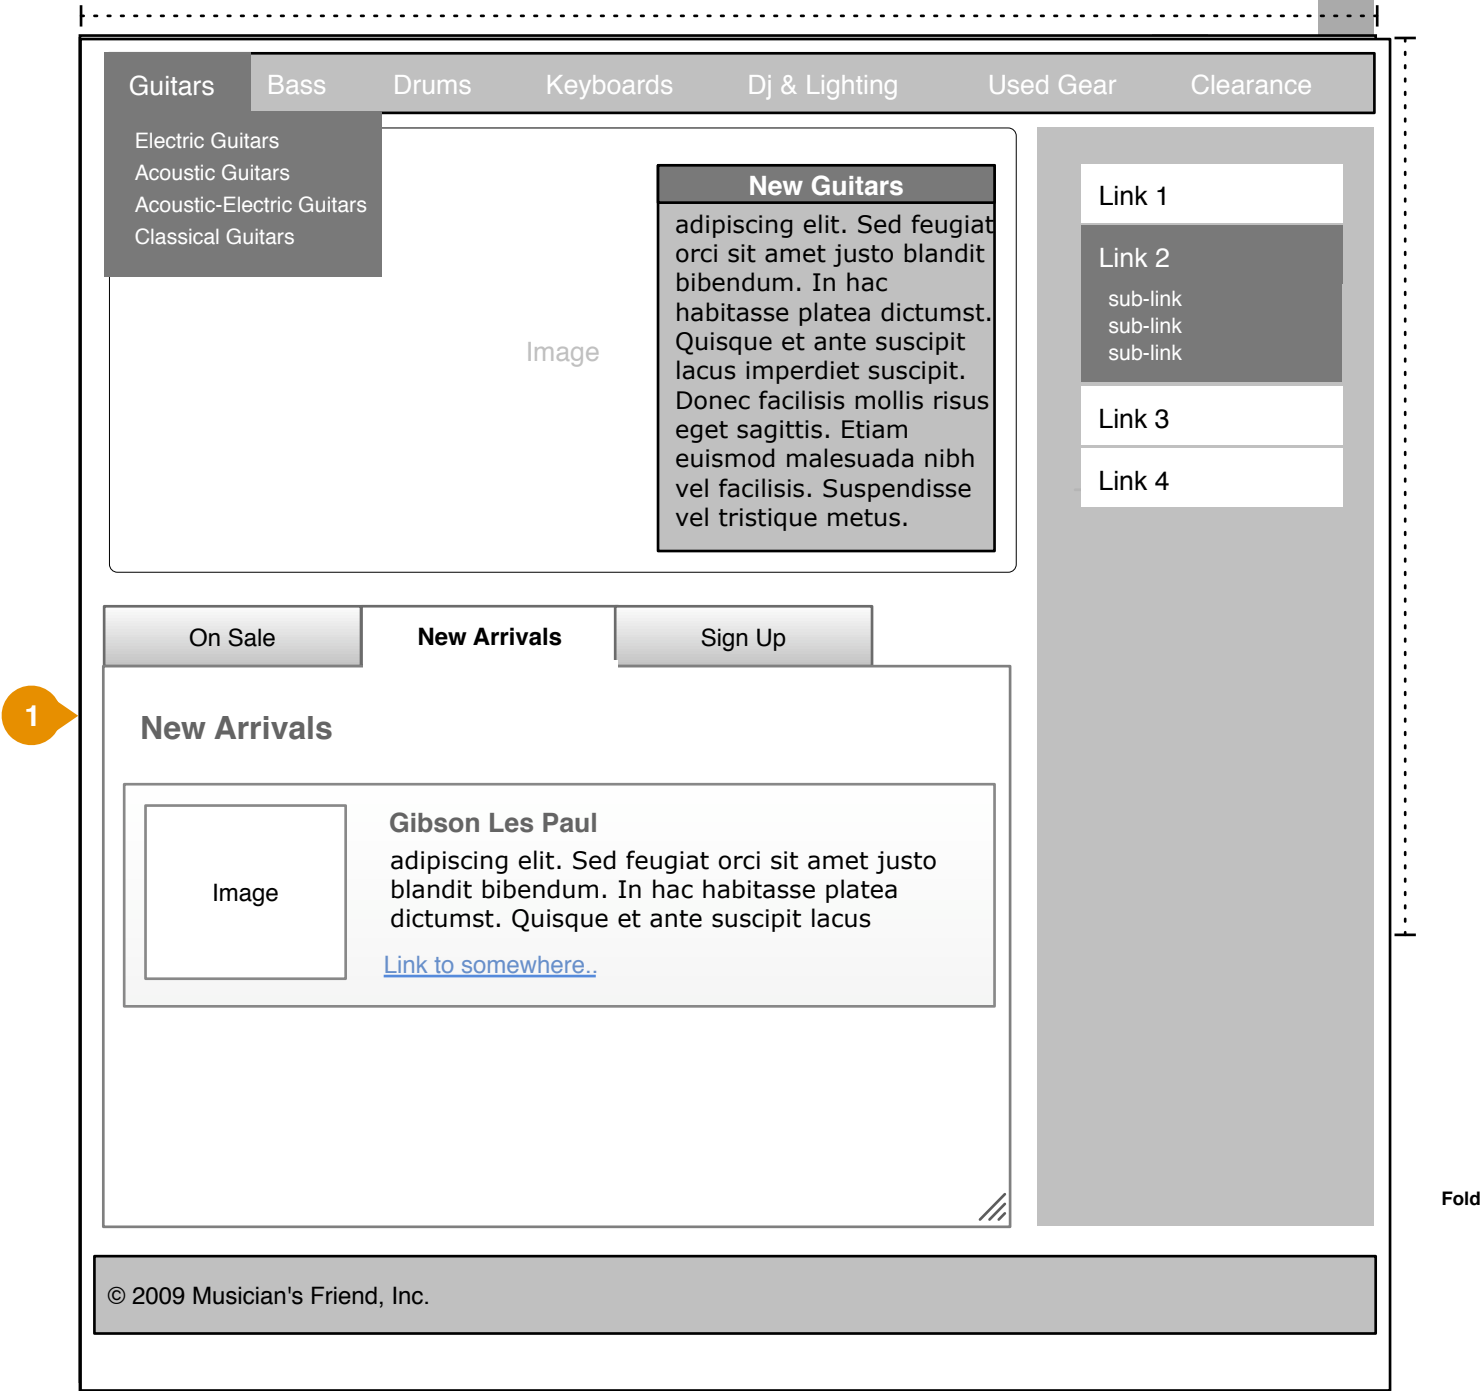

Please code this wireframe using standards compliant xhtml 1.0 strict, css level 2.1 and javascript. A div based table-less format should be used for layout. All code should validate against W3C standards (no errors, no warnings) and be cross-browser compatible among all 'grade A' browsers.

A folder structure has been created for you. Please include all of your css in an external style sheet in styles folder. Image assets needed to complete the exercise are located in the 'images' folder and specified in the annotations. A copy of jquery-1.3.2 is located in javascript folder, if you choose to use it.

Item	Title	Description
1	Top Navigation	Create hover states with background color change for all top level categories. Create the sub-navigation for guitar category only.
2	Guitar Sub-Menu	Should be visible on hover state of guitar category
3	Main Graphic	images/main.jpg
4	Promo Callout Text Box	Position this callout text box over the main graphic
5	Side Bar accordion menu	Create an accordion menu with four main categories and at least one sub-menu from one of the main categories
6	Tabbed Menu	Create a tabbed menu with three tabs. Each tab should open a content area onclick.
7	On Sale Product Images	images/product1.jpg images/product2.jpg images/product3.jpg

Musician's Friend - Front End Developer Layout

Item	Title	Description
1	New Arrivals Tab	Create an html fragment containing the 'New Arrivals' data and load it into the 'New Arrivals' tab via an ajax request. Use one of the product images from the 'On Sale' tab for the image in the html fragment.
